OurTo build a next-gen, digDigitalTo build a next-gen, digDigitaloperational efficiencyOperations System witVisionintegration and digital

To build a next-gen, digitally advanced, and sustainable airport platform that enhances passenger experience and leverages technology to boost operational efficiency and revenue. Our goal is to create a Smart Airport Operations System with a modular Airport-in-a-Box model for seamless integration and digital transformation across airports.

Revenue Generator

- Aero Revenues
- Non-Aero Revenues
- Cargo Revenues

Business Drivers

Carbon Neutral

- Cloud Adoption
- Energy Management
- Building Management

Sovereign Passengers

- Connected Journeys
- Information on Demand
- Channel Mix

Efficient Operations

- Intelligent Airside
- Passenger Processing

Safe, Secure, Compliant

- Airside Surveillance
- Cybersecurity
- Social Responsiveness

Disruption Management

Our North Star

Airport-in-a Box

Scalable and repeatable platform to quickly onboard future airports

Transparency & Governance

Common data model with

single source of truth

vehicle movements.

- Stand and gate information
- Departure predictions basis smart apron
- FOD detection
- Airside vehicle movement
- Runway friction monitoring

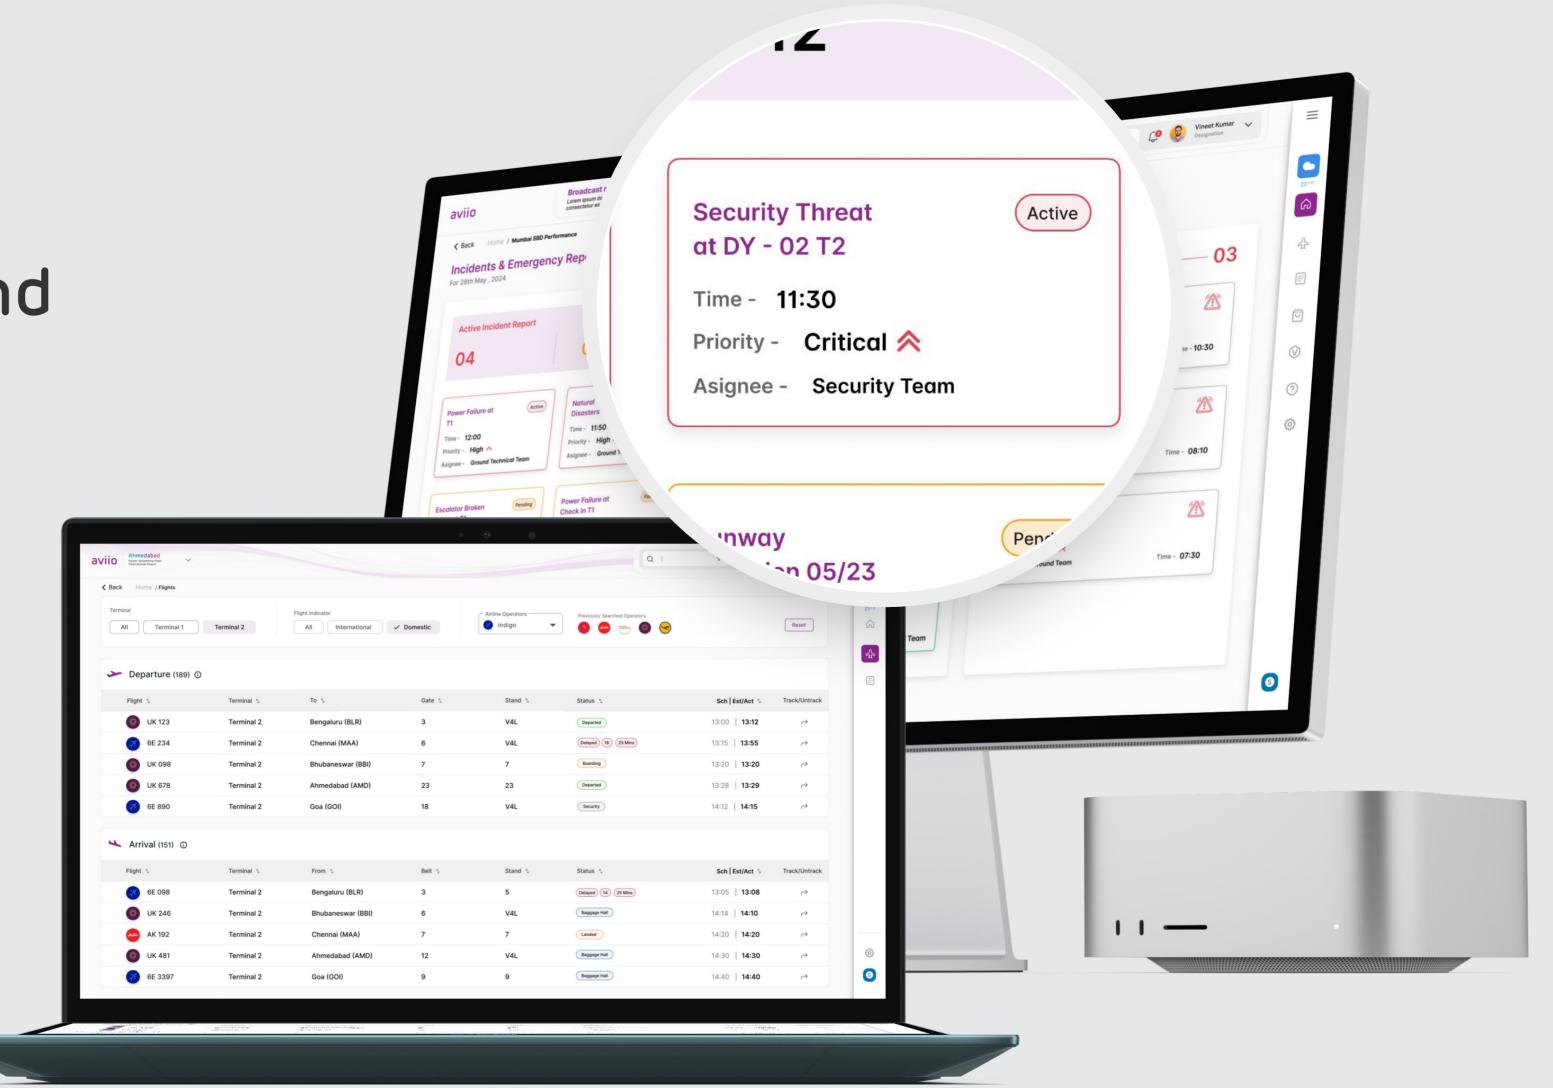

aviio improves scheduling and resource allocation for ground handlers.

- Arrival predictability
- ✓ FOD alert
- Weather updates
- Digital SOPs to enable tat monitoring

Airport Operator

aviio helps airport operator to manage flights and resources.

- Flight schedule
- Resource allocation & resource change updates
- Emergency response
- Incident management
- Field service management
- VIP flights management

Serving the aviation community and setting new standards for airport operations and passenger experience.
